EXPERIENCE

Mash Virtual – Software Developer

Aug 2024 – Apr 2026

C#, .NET 8.0, ASP.NET Core Web API, ASP.NET MVC, EF Core, LINQ, PostgreSQL

Delhi NCR

- **Backend Development:** Developed and maintained RESTful APIs and business logic across multiple projects using C#, .NET 8.0, ASP.NET Core Web API, and ASP.NET MVC, implementing reusable CRUD operations, validation, and error handling.
- **Database Engineering:** Implemented data access and persistence using Entity Framework Core, LINQ, and PostgreSQL, including complex queries, filtering, pagination, and schema changes; contributed to HRMS query optimization, improving application performance by approximately 25–30%.
- **Authentication and Authorization:** Implemented secure application access using ASP.NET Identity, JWT, and role-based authorization, supporting tenant-specific permissions and access-controlled application workflows.
- **Business Workflow Automation:** Implemented scheduled email notifications, SMTP integrations, salary slip PDF generation, CSV exports, dynamic feedback forms, and QR code generation using QRCode; integrated external business APIs where required.
- **Development and Testing:** Independently delivered assigned features while collaborating with the development team; validated API behavior using Postman and Swagger, managed source code using Git/GitHub, and used Docker in development workflows.

PROJECTS

QardHasana – Interest Free Microloan Provider (Mash Virtual)

2026

.NET 8.0, C#, ASP.NET Core Web API, Entity Framework Core, LINQ, PostgreSQL

- Developed and enhanced REST API endpoints for loan request management, approval workflows, and loan status tracking, implementing business logic, input validation and error handling.
- Implemented loan and transaction data management using Entity Framework Core, LINQ and PostgreSQL, including enum-based status transitions and validated database operations.
- Optimized database access by refining LINQ queries, applying appropriate indexes, reducing unnecessary database calls, and implementing filtering, sorting, and pagination.
- Developed dashboard and reporting functionality with date-, status-, and user-based filters, loan summaries, aggregations, and CSV/Excel exports.
- Implemented JWT authentication, role-based authorization and resource ownership checks, integrated external business APIs and SMTP services and tested endpoints using Postman and Swagger.

Setika – HRMS (Mash Virtual)

2025

.NET 8.0, C#, ASP.NET Core Web API, Entity Framework Core, LINQ, PostgreSQL

- Developed and maintained 40+ RESTful APIs for employee management, attendance tracking, leave management, tenant-based access control, and reporting.
- Implemented backend business logic, CRUD operations, and database migrations using Entity Framework Core, LINQ, and Database First, including punch-in/punch-out APIs, leave approval workflows, attendance dashboards, and salary slip PDF generation using iTextSharp.LGPLv2.Core 3.7.12.
- Scheduled email notifications and conditional email templates for birthdays, work anniversaries, celebrations, and leave workflows. implemented ASP.NET Identity and role-based authorization, and validated and debugged APIs using Postman and Swagger.

SessionFeed – Feedback System(Mash Virtual)

2025

C#, ASP.NET MVC, Entity Framework Core, LINQ, PostgreSQL

- Independently developed an ASP.NET MVC Feedback System with dynamic form creation, custom question types (MCQ, True/False, rating, and short answer), and form activation/deactivation.
- Implemented CRUD operations, authentication, role-based authorization, and input validation using Entity Framework Core, LINQ, and PostgreSQL, with tenant-specific forms and response storage.
- Developed dynamic form URLs and QR codes using QRCode, admin dashboards, response review, filtered feedback summaries, and CSV exports using database aggregation queries.

TECHNICAL SKILLS

- **Programming Languages:** C#, C++, Python, JavaScript, SQL
- **Backend & Frameworks:** .NET 8.0, ASP.NET Core, ASP.NET MVC, Web API, Entity Framework Core, LINQ, RESTful APIs, Dependency Injection
- **Databases & Data Access:** PostgreSQL, SQL Server
- **Architecture & Security:** Microservices, Clean Architecture, SOLID Principles, JWT Authentication, ASP.NET Identity, Role-Based Authorization
- **Frontend:** React.js, HTML, CSS, Tailwind CSS, Bootstrap
- **Tools & DevOps:** Git, GitHub, Docker, Postman, Swagger, VS Code, OpenCode
- **Computer Science:** Data Structures & Algorithms, DBMS, Operating Systems, OOPs

ACHIEVEMENTS

- **General Secretary, Cognitive Minds Society (DTU):** Mentored 25+ students through weekly technical sessions.
- Solved 500+ Data Structures and Algorithms problems across GeeksforGeeks, LeetCode, and other coding platforms.

EDUCATION

Delhi Technological University

Bachelor of Technology

2020 – 2024

CGPA: 8.3/10
